Reflection

End discussion
Reflection

• Reflection refers to thinking about personal experiences and trying to understand one's own actions

• This time we will go through the past phases and consider the success and the goals of the project
The aim of the project was to develop solutions on how to prevent bullying in schools

The aim was to empower those who are being bullied

But at the same time, also help those who bully and the bystanders who witness bullying

Also, the aim was to look at bullying critically
End discussion 2/2

• How did your group do?

• Did you achieve all these goals with your group?
Background assumptions 1/2

• Is bullying a problem for the community or an individual?
  • Does everyone have to change to stop bullying, or only the bully or the bullied?

• Is it good that technology controls people/bullies?
  • Or is it better for technology to help people to better understand each other?
Background assumptions 2/2

• Is it good that technology controls us? Or is it better that we control the technology?

• Is it better for technology to focus on stopping bullying (the problem) or is it better for technology to focus on preventing bullying (the solution)?
Values

• What features of the device you have created do you consider **important**? – Why

• What features of the device you have created do you consider **valuable**? – Why

• What features of the device you have created do you consider **necessary**? – Why

• What features of the device you have created do you consider **wanted/desired**? – Why
